FAMIL GULMAMMADOV

ML/AI ENGINEER & JAVA DEVELOPER

PROFESSIONAL SUMMARY

ML/AI Engineer trainee with solid foundation in Python programming, machine learning, and data analysis. Currently completing professional training in ML and Java backend development. Passionate about solving real-world problems using data-driven approaches. Actively developing practical projects in machine learning, Neural Network/DL, and software development.

TECHNICAL SKILS

Machine Learning & AI

- Python
- Pandas, NumPy
- Scikit-learn
- Data preprocessing and feature engineering
- Model training and evaluation
- Supervised learning algorithms

Programming

- Python
- Java (Core, OOP, Spring, Spring Boot)
- C (Basic)

Development Tools

- GitHub / GitLab
- Jupyter Notebook
- VS Code

SOFT SKILLS

- Analytical and logical thinking
- Ability to quickly learn and adopt new technologies
- Problem-solving mindset
- Responsibility and commitment to assigned tasks
- Good communication and cooperation skills
- Attention to detail and code analysis ability

LANGUAGES

Azerbaijan (Native)
Russian (Second Native - Education)
English (Professional - Education)
French (Beginner - A1)
Turkish(Intermediate)

COURSES

- **Cybernetics Academy Java Back-End Developer** (Scholarship)
- **Daxili Isler Nazirliyi & IDTech Academy ML/AI Engineering** (Scholarship)

PROJECTS

Machine Learning & Data Science Projects

Cancer Prediction System

- Developed a complete machine learning pipeline for medical data classification
- Performed data preprocessing, feature engineering, and model evaluation
- Implemented and compared multiple classification algorithms to identify the best-performing model
- Technologies: Python, Scikit-learn, Pandas

Customer Churn Prediction

- Built predictive models to identify customers at risk of leaving a service
- Conducted exploratory data analysis and feature selection to improve model accuracy
- Applied and compared Logistic Regression, Decision Trees, and ensemble methods
- Technologies: Python, Scikit-learn, Pandas, Jupyter Notebook

Machine Learning Algorithms Repository

- Implemented classical ML algorithms both from scratch and using libraries to deepen understanding of core concepts
- Covered supervised and unsupervised methods including Linear Regression, Logistic Regression, Decision Trees, and K-Means Clustering
- Implemented ensemble methods including AdaBoost, Gradient Boosting, XGBoost, CatBoost, and Random Forest
- Focused on model evaluation techniques, hyperparameter tuning, and performance comparison
- **Technologies:** Python, Scikit-learn, Pandas, NumPy, Jupyter Notebook

Deep Learning & NLP Studies (In Progress)

- EMNIST Alphanumeric Recognizer, E-Commerce-Sales-Prediction, RNN-LSTM-Sentiment-Analyzer, and etc. Staying on this path and constantly working.
- Studying Deep Learning architectures including CNNs and RNNs for image and sequential data tasks
- Exploring NLP techniques including text preprocessing, embeddings, and transformer-based models
- **Technologies:** Python, PyTorch, Transformers (Hugging Face) and etc.

– **inLink - CEO/CIO -** Leading inLink, an escrow-based freelance platform with secure payments, handling product vision, backend development, and ML/AI features
– Novum(Co-Founder) - Co-founding Novum, responsable for ML/AI and Presentation/Pitching sides, system design and building scalable product features

EDUCATION

- French-Azerbaijani University - UFAZ

Bachelor's degree, Computer Science (2024 - 2028)(English sector)

- Université de Strasbourg

Bachelor's degree, Computer Science (2024 - 2028)(English sector)

- Zarifa Aliyeva Lyceum

1s group (2021 - 2024) (Russian sector)
DIM - **624.2** points with 150/150 physics

- 83 school lyceum(2013 - 2021)(Russian sector)

CERTIFICATES

- B2 English Level – Oxford College Courses
- OCI AI Foundations Associate 2025 (1Z0-1122-25)
- Cisco IT Essentials Certificate
- Cisco Using Computer and Mobile Devices Certificate
- Python Kaggle 2025
- ICPC Programming Contest - Honorable mention
- Fibonacci Olympiad III place

EXPERIENCE AND ACHIEVEMENTS

– World Robotics Olympiad (September 2023)
– Technofest (June 2023)
– ICPC (International Collegiate Programming Contest) (October 2024)
– Green Hackathon (October 2024) / MicroSaaS GDG Hackathon (September 2025) / Senaye 4.0 Hackathon(December 2025)
– UFAZ Volunteers Club (since 2024 October)
– UFAZ İnformation Security Club (since 2025 June)
– Pasha Hackathon Volunteering
– CodeAlpha Online IT Intern
– Redynox Online CyberSecurity Intern
– AKTA CyberSecurity BootCamp (July 2025)
– The Fibonacci International Entrepreneurship & Startup Category Podim finish
– DeepTech statrup project incubation program
